

**Amendments to the Abstract**

Replace the abstract with the following replacement abstract:

A device and a process ~~for the preparation of~~ are employed to prepare sheets ~~(7, 17)~~ are specified from a film tube. The ~~following work process~~ steps are involved in the preparation of ~~the sheets~~; include

extruding a the film tube, ~~(1)~~

laying the film tube flat and squeezing it, ~~(1)~~

reversing the film tube, ~~(1)~~ and  
cutting the extruded film tube ~~(1)~~.

~~In addition the invention contains following new characteristics:~~  
~~the~~ The film tube ~~(1)~~ is cut before the squeezing ~~follows~~ step  
and

at least one resulting sheet ~~(7, 17)~~ runs through ~~(1)~~ only one reversing device ~~(100)~~ before ~~it~~ the sheet is fed to a stationary processing device or storage device.

~~(Figure 3)~~

For the examiner's convenience, a clean text version of the replacement abstract (74 words) is presented below:

A device and a process are employed to prepare sheets from a film tube. The process steps include extruding the film tube, laying the film tube flat and squeezing it, reversing the film tube, and cutting the extruded film tube. The film tube is cut before the squeezing step and at least one resulting sheet runs through only one reversing device before the sheet is fed to a stationary processing device or storage device.
